Assignment 7.2 – Group Project (Milestone 1): Requirements Gathering

During this week you will be assigned to a team of 3-4 developers and are expected to complete the following tasks:

1. Designate a team captain and team name
2. Identify the goal(s) of the website
3. Identify the core users of the website
4. Create detailed personas to reflect the top five (5) user types
5. Identify a list of the top five (5) requirements from the standpoint of the user. Use standard story writing format.
6. Identify a list of the top five (5) requirements from the standpoint of a user interface designer/developer. Use standard story writing format.

Pay close attention to the recommended schedule, requirements, and milestones. Do not wait until the last minute!
